

Network and Systems Services Catalogue

Adhere Systems LLC

Empowering organizations through secure, scalable, and reliable IT infrastructure

1. Introduction

Adhere Systems LLC provides a comprehensive suite of network and systems services tailored to small and medium-sized enterprises (SMEs), public institutions, and enterprise organizations. Our solutions are designed to optimize performance, ensure security, and support operational continuity.

2.1 Network Infrastructure Services

Service Name	Description	Key Benefits
Network Design & Architecture	Design of scalable LAN/WAN architectures tailored to client needs	High availability, scalability, future-ready designs
Structured Cabling	Installation of CAT6, CAT6a, and Fiber cabling	Reliable connectivity, minimal signal loss
Wireless Network Solutions	Enterprise-grade Wi-Fi planning, deployment, and optimization	Seamless coverage, secure wireless access
Network Upgrades & Optimization	Performance tuning, hardware refresh, and redesign	Improved speed, security, and reliability
VLAN & Subnetting Design	Logical network segmentation and IP planning	Improved security and performance

2.2 Network Security Services

Service Name	Description	Key Benefits
Firewall Installation & Management	Deployment of pfSense, Fortinet, Cisco, and other solutions	Centralized control, policy enforcement
VPN Setup (Site-to-Site & Remote Access)	Secure connectivity for remote users and branch offices	Data confidentiality, secure remote access
Network Access Control (NAC)	Implement MAC filtering, 802.1X, and device profiling	Granular access control, reduced threat surface
Intrusion Detection & Prevention Systems (IDS/IPS)	Real-time monitoring and threat detection	Proactive defense, alerts, and mitigation
Secure Network Monitoring	24/7 traffic analysis, logs,	Early threat detection,

	and anomaly detection	compliance support
--	-----------------------	--------------------

2.3 Systems Administration & Management

Service Name	Description	Key Benefits
Windows & Linux Server Setup	Installation, hardening, and configuration of servers	Reliable infrastructure, security baseline
Active Directory Services	Setup and management of domains, users, and policies	Centralized user management and access control
Patch Management	Scheduled updates and vulnerability remediation	Reduced attack surface, compliance alignment
Virtualization (VMware, Hyper-V, Proxmox)	Deployment of virtual environments for resource optimization	Lower hardware costs, flexible scaling
Backup & Disaster Recovery Planning	On-prem and cloud-based backup strategies	Business continuity, data recovery assurance

2.4 IT Support & Maintenance

Service Name	Description	Key Benefits
Remote & Onsite Support	Tier 1–3 technical support via phone, remote access, or onsite	Reduced downtime, expert resolution
Preventive Maintenance	Routine checks, firmware updates, and system health reports	Extended equipment lifespan, reliability
Asset & Configuration Management	Inventory tracking and configuration database maintenance	Efficient resource management
SLA-based Support Contracts	Custom support plans with guaranteed response times	Peace of mind, prioritized service

3. Why Choose Adhere Systems Ltd

- Certified Network and Security Experts (Cisco, CompTIA, CEH, etc.)
- Proven experience with government, education, and SME clients
- Agile and tailored solutions for evolving IT needs
- Transparent pricing and SLAs
- Dedicated support and proactive monitoring
